Income protection

Small commitment, big peace of mind

Buying a home is one of the most significant purchases people will ever make. So people will go out of their way to protect it with insurance, alarm systems, fencing and lighting. But it may surprise you to learn it's actually not your biggest asset. Your ability to earn a continuous income far surpasses the value of your home.

Although most people know how much insurance they have on their homes, very few understand what coverage they have on their income. Some people assume their employer will pay their salary in the event of an accident. But they often skip the important step of finding out if that coverage exists, how it works and if there are any other options.

We shop around and educate ourselves when picking insurance for our homes, our cars, our health and our lives. So why spend so little time insuring incomes? It's the very thing that drives all other assets.

Income protection is a simple insurance policy that gives you money if, in the future, you are totally disabled and can't work due to an illness or injury.

How it Works

1

Suffer an illness or injury

You aren't able to work for an extended period because you are totally disabled due to an illness or injury.

2

Submit a claim

Submit your claim to Assurity.

3

Get paid

Receive monthly benefits while disabled, after your policy's elimination period, based on the benefit period you elect.

While you're recovering, you can use the money to help you cover regular monthly bills, like your mortgage, car payment, credit cards, groceries and other expenses. If you do return to work, but can't do the same job because of your disability, you may still receive monthly benefits.

Need-to-know policy terms

Elimination Periods

The number of days one must be totally disabled before they become eligible for benefits—a longer elimination period lowers the cost of coverage, and vice versa.

Benefit Periods

The maximum timeframe benefits are payable for a given period of total disability—a longer benefit period will result in a higher cost of coverage, and vice versa.

Own Occupation Definition of Disability

Assurity defines a total disability for the first two years of the benefit period as the inability to work at the insured's regular occupation at the time disability begins, even if the insured still might be able to work at another occupation.

Total Disability

A sickness or injury is considered a total disability if it keeps you from doing all the substantial and material duties of your regular job and requires a physician's care during the first two years of the benefit period. After the first two years, a sickness or injury is considered a total disability if it keeps you from doing any occupation and requires a physician's care.

How much coverage do I need?

Income protection is meant to keep enough money flowing into your household if you're disabled and unable to work, so it's important to look at your expenses and determine how much you'll need for replacement. If the disability becomes long term, planning for things like retirement, future living expenses and children's education expenses is essential.

Start with a look at your monthly bills

Choose a monthly benefit amount that helps cover the bulk of your expenses.

How much does it cost?

Income protection can cost as little as one percent of your income. It's hard to think about insurance versus all those other things you buy. But protecting your income helps you live your best life in the long run.

How much does income protection stack up against other things you buy each month? Let's compare.

Car insurance:

\$90¹

Dining out:

\$250¹

High speed internet:

\$66²

Cell phone:

\$85¹

Income protection:

\$75³
